IMMUNOLOGY

Free Thyroid Profile | Serum

Triiodothyronine (T3), Free Chemiluminescent Immunoassay	3.41	pg/mL	2.77 - 5.27
Thyroxine (T4), Free Chemiluminescent Immunoassay	1.16	ng/dL	0.78 - 2.19
Thyroid Stimulating Hormone (TSH) Chemiluminescent Immunoassay	1.217	μIU/mL	0.4 - 4.049

Thyroid Stimulating Hormone (TSH), also called Thyrotropin is a hormone secreted into the blood by the Pituitary gland (a gland present in the brain). It signals the thyroid gland to make and release the thyroid hormones (T3 & T4) into the blood. High TSH level indicates that the thyroid gland is not making enough thyroid hormone (primary hypothyroidism). Low TSH level usually indicates that the thyroid is producing too much thyroid hormone (hyperthyroidism).

Factors influencing TSH levels

- TSH level** shows a significant decline after meal intake in comparison to fasting values. If the patient is taking any thyroid medication different times each day, they may sometimes be taking the thyroid hormone on an empty stomach, and sometimes with or after having food. This may have clinical implications in the diagnosis and management of hypothyroidism, especially Subclinical hypothyroidism.
- Circadian Rhythm:** TSH levels follow a circadian variation, reaching peak levels between Morning 2 - 4 am and at a minimum between Evening 6-10 pm. The variation is of the order of 50%. There are studies which quote variations up to 70 % depending on when the sample is drawn during which time of the day. Hence time of sample collection during a day can significantly influence on the measured serum TSH concentrations.
- Other Factors:** It is important to recognize that TSH is a labile hormone and is subject to non-thyroidal pituitary influences (glucocorticoids, somatostatin, dopamine etc.), stress, activity, that can disrupt the TSH/FT4 relationship. Genetics, Poisonous

substances and radiation exposure, Inflammation of the thyroid gland, Deficiency or excess of iodine in the diet, Pregnancy, Certain medications – antidepressants, cholesterol lowering drugs, chemotherapy drugs, steroids, Thyroid cancer.

In **pregnant females** the reference range of TSH differs. Please refer the table below for the same:-

PREGNANCY	TSH REFERENCE RANGE (μIU/mL)
1st Trimester	0.100-2.500
2nd Trimester	0.200-3.00
3rd Trimester	0.300-3.00

CONDITIONS OF LABORATORY TESTING & REPORTING

- Tests marked with NABL symbol are accredited by NABL vide certificate no MC-6403
- It is presumed that the test sample belongs to the patient named or identified in the test requisition form. Test results released pertain to the specimen submitted.
- Laboratory investigations are only a tool to facilitate arriving at a diagnosis and should be clinically correlated by the Referring Physician.
- All tests are performed and reported as per the turnaround time stated in the Orange Health Labs Directory of Services (DOS).
- Orange Health Labs confirms that all tests have been performed or assayed with the highest quality standards, clinical safety & technical integrity.
- All test results are dependent on the quality of the sample received by the Laboratory and the assay technology.
- Report delivery may be delayed due to unforeseen circumstances. Inconvenience is regretted.
- A requested test might not be performed if:
 - The specimen received is insufficient or inappropriate, or the specimen quality is unsatisfactory
 - Incorrect specimen type
 - Request for testing is withdrawn by the ordering doctor or patient
 - There is a discrepancy between the label on the specimen container and the name on the test requisition form
- Test results may show interlaboratory variations.
- Test results are not valid for medico-legal purposes.
- This is a computer-generated medical diagnostic report that has been validated by an Authorized Medical Practitioner/Doctor. The report does not need a physical signature.

REPORT PRINTOUT/HARDCOPY

- Patients can collect free report printouts from our Lab or the nearest Collection Centre.
- Hard copies can be delivered within 24 hours for ₹200/report (non-refundable after dispatch).
- For assistance, contact Orange Support at +91-9008111144.
